Fuel Armor

Beckett FuelArmor™ is a heating oil treatment that reduces the need for unscheduled heating service calls. FuelArmor™ works by stabilizing heating oil chemistry and preventing fuel oxidation, corrosion and sludge build-up. Better fuel performance means less heating service calls are necessary, and that makes your customers happy.

Beckett FuelArmor™ has a proven track record in a wide variety of applications including the oil heating industry, where oil dealers have experienced outstanding results in stabilizing fuel, dispersing sludge and reducing service costs.

Low Pour

Low Pour Fuel Pour Point Suppressant – improve reliability, reduce maintenance.

Maintaining your customer's fuel heating system has never been easier! Beckett's Low Pour additive is formulated to reduce the pour point and improve the reliability of middle distillates in cold weather.

Water Finding Paste

A daub on your measuring stick will turn color from green to vivid purple in contact with water. Hundreds of tests from a single jar.

Part No.	Description
80001	FuelArmor™ Annual Fuel Treatment – 8 oz. Bottle
80002	FuelArmor™ Stabilizing Fuel Treatment – 5 Gallon Pail
80003	FuelArmor™ Stabilizing Fuel Treatment – 55 Gallon Drum
80004	Low Pour™ – Pour Point Depressant – 16 oz. Bottle
14000	Water Finding Paste – 2½ oz. Jar

Fill Cap Keys

Part No.	Description
14349	Six-Way Key
14365	Two-Way Key

The Two-Way Key fits Fill Caps: 4181, 4182, 4183, 4184, 4185, 4307, 4308, 4309, 4316, 4317. The Six-Way Key fits 90% of all caps.

Hand Pumps

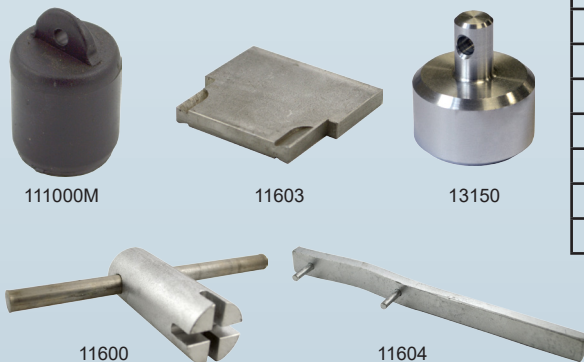

Part No.	Description	Firomatic Reference No.
12552	Handpump Assembly	91304000
12551	Handpump Only	91304001
12553	Handle for Handpump	91304002
12554	Handpump "O" Ring	91304003
12561	Hose Kit Less Adapters	91304016
12562	Hose Kit – Complete	91304017

The Handpump is a combination pressure and vacuum handpump for air or liquids. Used to clean lines, free stuck valves, prime pumps, build up test pressure or vacuum in lines and tanks. The two-way pump assembly has a solid brass barrel and is fitted with two check valves to attach directly onto lines, use with extension tubing, or pipe permanently into a system. It is also furnished (12551) without the valves.

The handpump hose kit contains flexible reinforced hoses plus all the fittings necessary to add chemicals to boilers, clean lines, free stuck valves, prime pumps and to build up test pressure or vacuum in lines and tanks. Fittings are designed to be hand-tightened and easy to use.

Fill Connector Installation Tools & Parts

Part No.	Description
111000M	Unlocking Device for Time Saving Fills & SpeedFill® Locking Cap
13150	Unlocking Device for Speedfill® Locking Cap Only
11600	Installation Wrench (Non Ratchet) for Time Saving Fills® connectors
11601	Socket Attachment – For Time Saving Fills® Connectors Only
11602	Socket Attachment – Time Saving Fills® & SpeedFill® Connectors
11603	Installation / Removal Tool for Speed Kleen Underground Fills
11604	Cap Lock Wrench for Above & Underground Fittings
11703	Flat Gasket for 11706/11706L Caps
